# OpenAIRE Services for Research Performing Organisations

A short overview
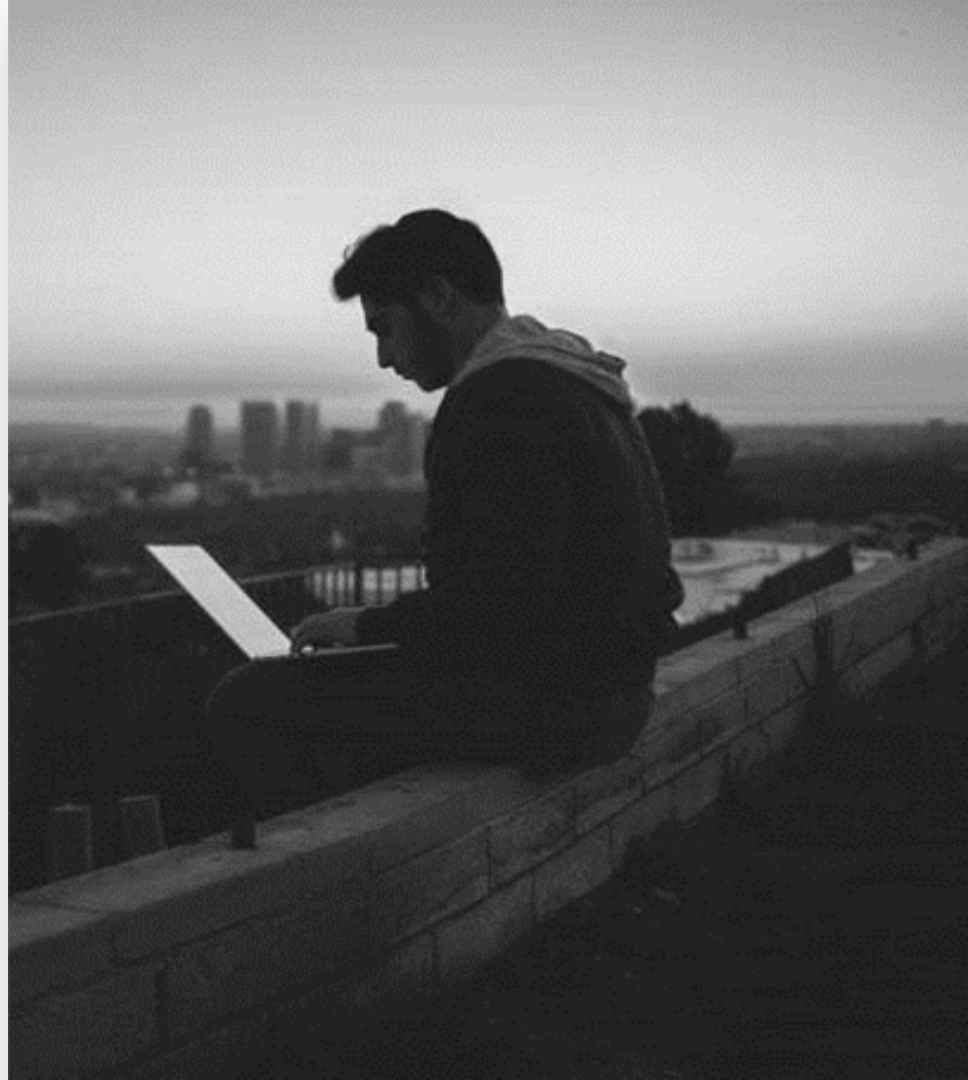

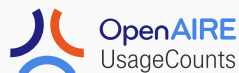

https://www.openaire.eu/

Access to knowledge is fundamental for all, to drive change and create opportunities. Open Science paves the way.

European Commission leads.
OpenAIRE co-leads.

OpenAIRE offers a series of services to Research Performing Organisations
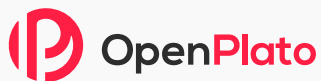

Process

Step 01
Express your needs

You request services through an **OpenAIRE NOAD** or by contacting OpenAIRE directly. OpenAIRE listens to your needs and a in-detailed discussion leads to solutions.

Step 02
Let's make it official

OpenAIRE signs an **MOU** with you and initiates the collaboration. Personalized 1-1 calls for services are arranged.

Step 03
Public Launch

OpenAIRE supports the **interconnection**, **integrations**, **operations** and **delivery** of its services and disseminates the collaboration.

You enjoy research outcomes and focus on your priorities, while we design, build, set up, run and maintain the OpenAIRE services for you.
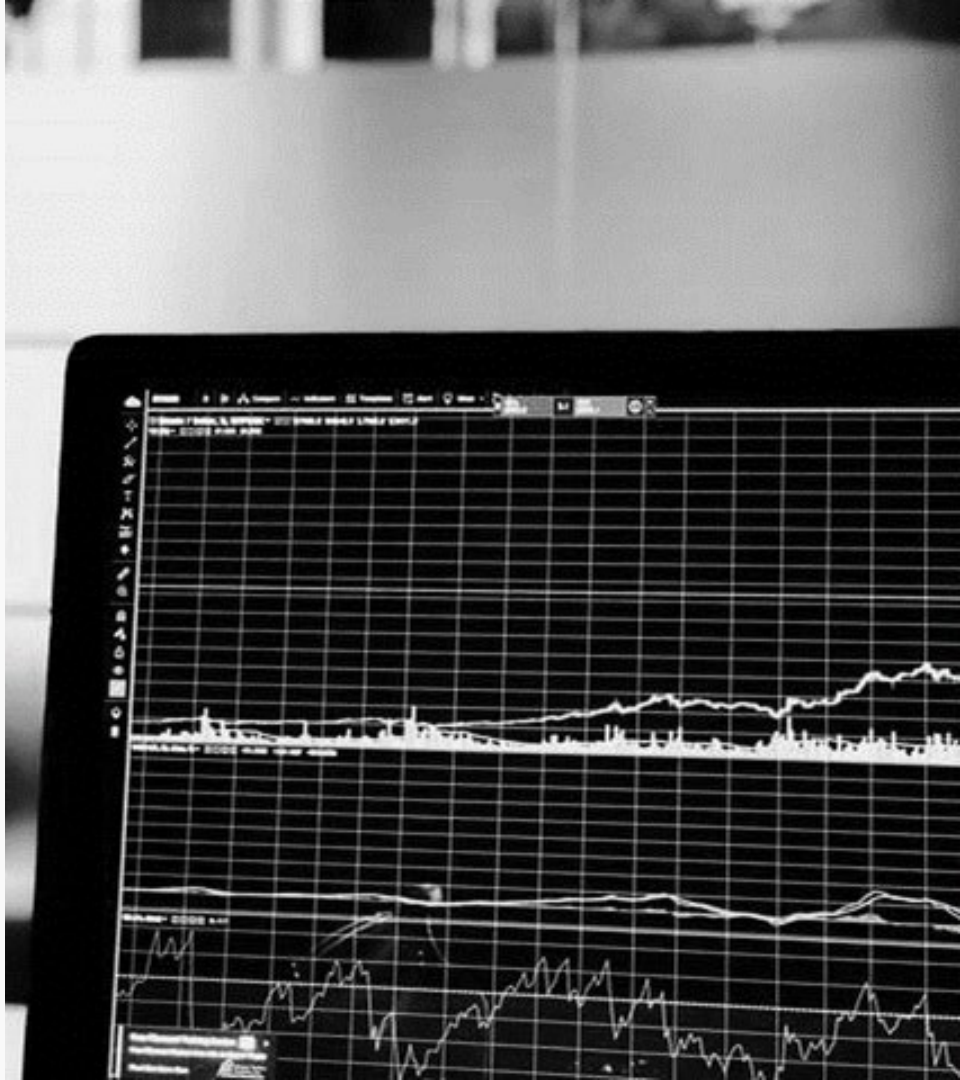

CONNECT

The realization that many citizens, researchers, organisations are getting lost in the research data trek alerts us.

Approximately 2.725 officially recognised higher-education institutions are in Europe (19.9% global)*.
While alliances of universities emerge.

Research communities, organisations, universities and their alliances, need tools to discover, assess and outreach their research findings.

How to collect all scattered research works on common topics for universities, researchers, and help them share that knowledge automatically?

Create and manage a personalized gateway for your research community to mobilise the discovery, assess and outreach of research products that matter to you and your audiences.

How it works

Step 01
Express your needs

You request a call with a **NOAD**, or the **OpenAIRE CONNECT service manager** and get informed about your needs and the Open Science practices of your community.

Step 02
Configuration

OpenAIRE will create a first version of your gateway. You assign curators that will manage it. OpenAIRE provides millions of research works metadata information. The curators will define the criteria to identify those that are relevant for the community

Step 03
Public Launch

OpenAIRE collaborates and supports you to finalise your gateway. **No Code Needed!**

We help you focus on selecting the information you need to show on your personalized research community gateway. Privately or Public.

As simple as that.

How OpenAIRE CONNECT can help

- Empower your community via Open Science

- Enable thematic discovery of information

- Save time and resources

- Configurable by you. Use your organization's branding

- Get broader visibility and impact

- Automatically updated with new research works. Integrated with scholarly communication services like ORCID, EUDAT B2Note, Crossref

The onboarding process

1 Send a request via a NOAD or direct contact to helpdesk@openaire.eu
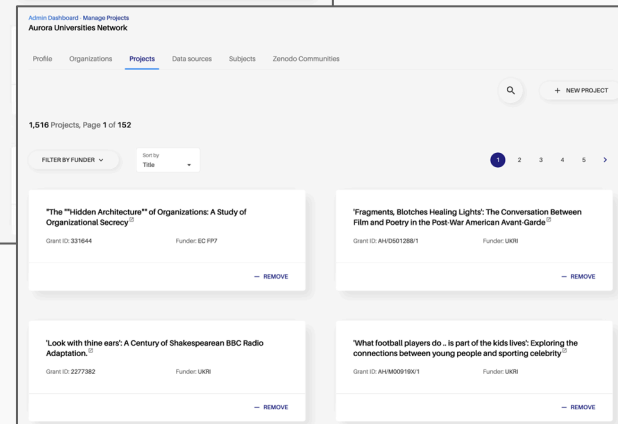

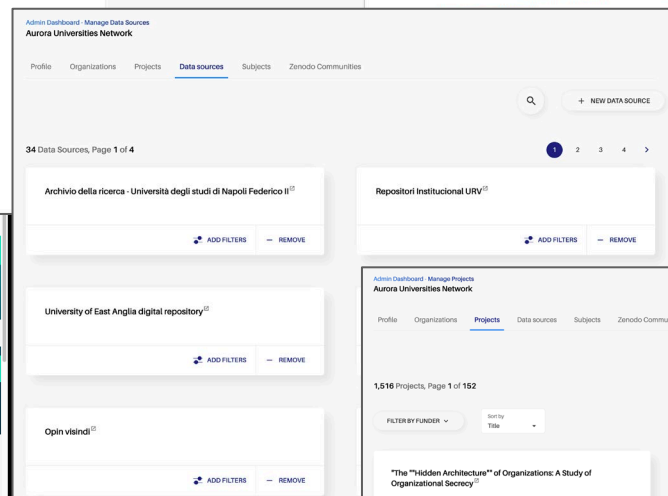

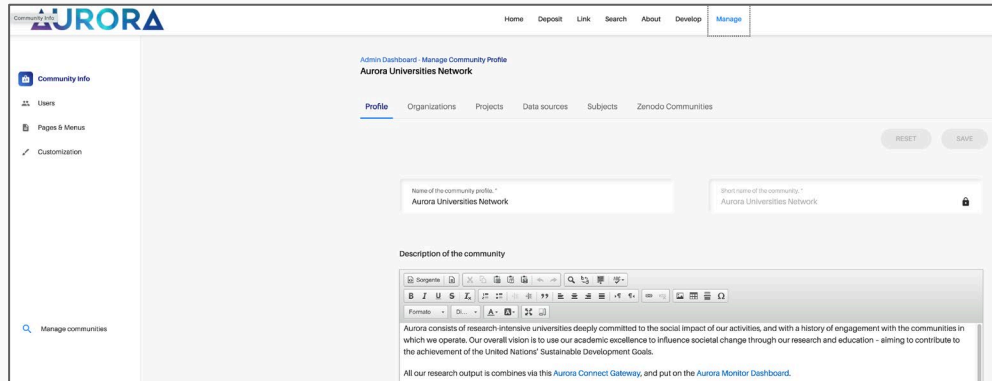

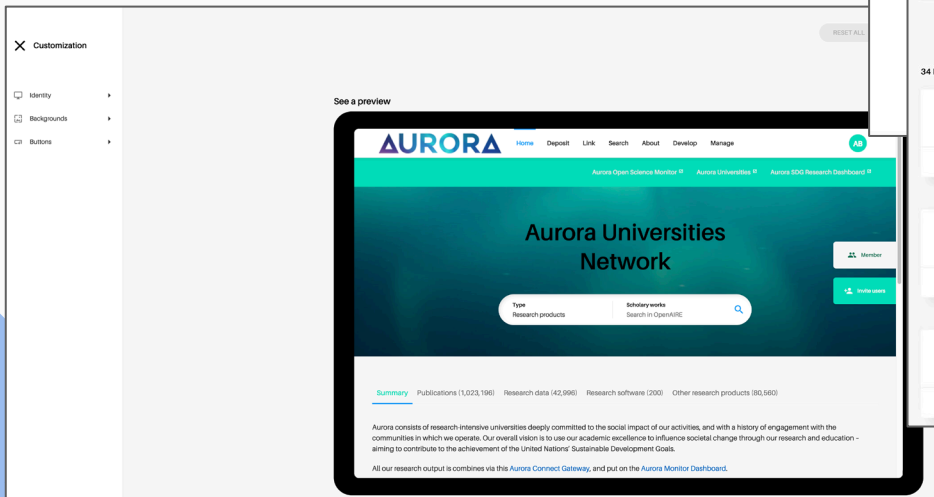

2 We sign an MOU while we agree on the information you want to show, and decide upon a public or private portal (this option can be reversed anytime)

3 Start managing your own personalised gateway!

What will you get?

An admin dashboard for the curators to configure the gateway

What will you get?

A customised portal for your community where users can ...

SEARCH any type of research works

Check out the UPTAKE of Open Science practices of the community

Find the right place to DEPOSIT
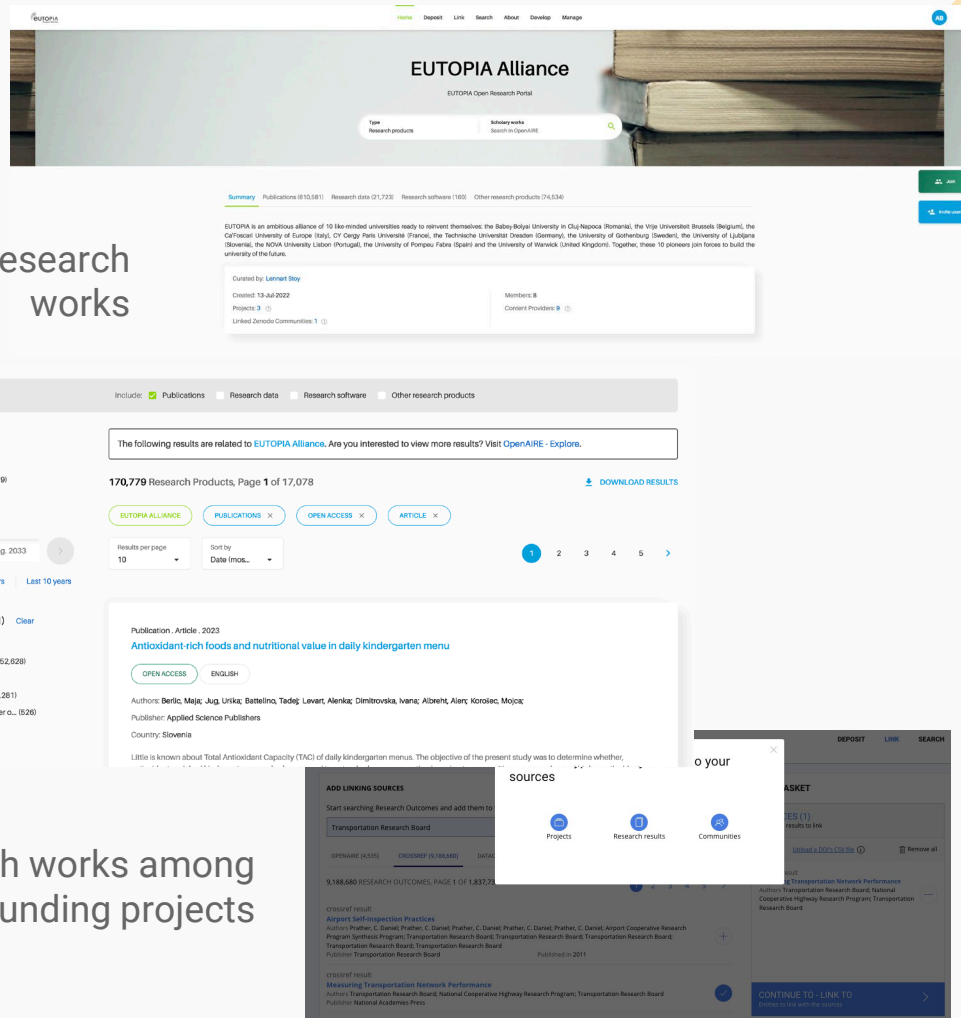

LINK research works among them and with funding projects

Case studies

KNOWMAD INSTITUT

The European Institute for Multidisciplinary Studies on Human Rights & Science

Topic: Human Rights, Sustainable Development, Drug Policy, New Technologies, Ethnobotany, and Special Populations

Gateway:
https://knowmad.openaire.eu/

EUTOPIA European University

An alliance of 10 like-minded universities (Romania, Belgium, Italy, France, Germany, Sweden, Slovenia, Portugal, Spain, UK)

Topic: Open Research

Gateway:
https://eutopia.openaire.eu/

AURORA

An alliance of 9 universities (NL, Iceland, UK, Germany, Italy, Spain, Austria, Czech Republic, Denmark, France) & associate partners

Topic: societal change, contribution to the United Nations' Sustainable Development Goals

Gateway:
https://aurora.openaire.eu/
